

UNPLUG YOURSELF FROM HIGH-COST ENERGY BILLS FOREVER!

SAVE 40-58%

thermosaver Spray Foam Insulation

thermosaver BENEFITS

- Highest Insulation Value
- Eliminates Mold
- 100% Air Barrier
- Greatly Reduces Noise
- Used by NASA

MAXIMIZE YOUR INVESTMENT

Our unique energy evaluation process guarantees the highest rated thermal seal available. Combining our proprietary installation process, continuous testing throughout your project, and the use of the

highest-caliber materials, we offer results that surpass the design specifications of the aerospace industry.

ENERGY-EFFICIENT INSULATION SYSTEMS

EFFECTS OF AIR LEAKS

A properly sealed building envelope is critical— Heating and cooling losses cost property owners millions. Leaks can be:

- Flaws in the building envelope
- Windows and doors lacking weather stripping
- Absent or deteriorated insulation in critical areas
- Insufficient, settling or underperforming insulation

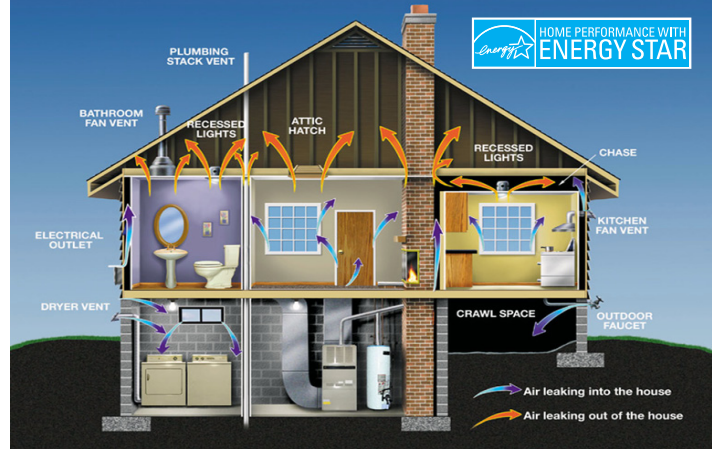

ENERGY-EFFICIENT INSULATION

**SAVE
40-58%**

thermosaver Spray Foam Insulation

IMPROVED ENERGY EFFICIENCY

Thermosaver's patented foam insulation provides an exceptional R-value, which results in heating and cooling cost savings. Drafts are virtually eliminated so a more uniform indoor temperature is maintained. Thermosaver doesn't settle over time, so you will enjoy these savings for the life of your home.

ENERGY COMPARISON

Thermosaver's Unique Insulation vs. Traditional Insulation

Case Study	Fiberglass Insulated Home	Thermosaver's Foam Insulated Home	Thermosaver's Insulation Energy Savings
10 identical homes in Roanoke, VA	769 gallons propane = \$2437.73	321 gallons propane = \$1017.57	58%
Comparable 2400 sf residences, Sacramento, CA	Monthly average utilities = \$494	Monthly average utilities = \$256	48% \$238/month average savings
Comparable 1800 sf residences, Atlanta, GA	Monthly average utilities = \$288	Monthly average utilities = \$180	38% \$108/month average savings

CASE STUDIES REPORT SAVINGS OF UP TO 58% WITH R 7.14 FOAM
